

Project LIFE/SEARCH Open House

Project SEARCH-West Chester and Project LIFE-Fairfield Campus jointly organized an Open House event on November 4, welcoming more than 100 potential interns. Representatives from our associate school districts accompanied students who had the chance to explore displays created by our current interns. During this interactive session, they had the opportunity to engage with the interns, asking questions about their job training rotations and gaining insights into the programs offered.

In addition to the informative displays, Project LIFE interns from LIFE with Coffee were on hand to offer a selection of beverages for the students to enjoy. The event also featured the presence of Opportunities for Ohioans with Disabilities and the Butler County Board of Developmental Disabilities, both of which provided valuable resources and connections for students seeking further information and support.
